SUSTAINABILITY

Our commitment to sustainability guides all our actions – both on and off property. From how our land is used to grow food, to how we manage our energy and waste, our efforts to conserve water, source local and seasonal ingredients for the resort’s menus, and even support local projects. We invest in a full-time team dedicated to driving our sustainability efforts. By filtering and bottling our own still and sparkling water, we reduce the carbon footprint associated with the packaging and transporting of drinking water. By using only glass water bottles, we eliminate all plastic bottles from resort operations, part of our effort to be completely plastic free. Six Senses Ibiza runs a Sustainability Fund that supports local organizations and companies that make a positive social and environmental impact. One example is a Posidonia project dedicated to replanting the local sea grass which acts as a natural water purifier.

A fixed percentage (0.5%) of the total resort revenue goes into the Sustainability Fund, as well as guest donations.
